Testimonial

Dear Richard.

On behalf of the town of Lake Park, I would like to thank you for introducing your Carbon Cleaning services to our maintenance facility. Following the initial cleans you performed on INTERNATIONAL and MACK garbage trucks; it became obvious that we had a problem, caused by carbon build up.

Since you performed a carbon clean, all the drivers have reported much more power and far less " Regen "issues with the trucks, and I have seen a lot less "down time" and repairs which is a big cost saving for the town.

We will continue to use your services as part of our PM program, and I wish you every success with your remarkable service.

Yours Sincerely.

Paul Mathis
