Payseur Parcel Service  
Charlotte, NC

7/15/2020

**Our company wanted to thank CarbonTek for introducing a very valuable service to us . We run a fleet of seven (7) semi-tractors for FedEx Linehaul, out of Charlotte NC. We grew so frustrated with our fleet, constantly having after treatment issues and regen issues. Especially with the cost of these repairs over the road. The costs became astronomical!**

**We became interested in the CarbonTek service and decided to test it on one of our tractors and monitor the results over approximately 4/5 month period. After performing their hydrogen service and installing the Atmos Clear unit , the results show that our tractor went from doing 5.9 miles per gallon to 6.4 miles per gallon in about 2 months. More importantly we notice the soot level was at zero and we have not had any after treatment issue since we started running the CarbonTek program. We run most of our equipment 6 days a week and incur a tremendous amount of idle time. So, the CarbonTek/ Atmos Clear program really saved a lot of money and down time on the road. So much that we have started recommending Carbontek to other FedEx contractors and we are in the process of expanding the service to our entire fleet.**

**Thank You**
