

BAKER

drive away different

December 22, 2020,

Baker Nissan has offered CarbonTek Hydrogen Service for several years now and it has been a very trusted and preferred Service for our customers. Our Service Advisors love the product and the results because our customers have enjoyed the benefits of better power and fuel mileage the service offers. The CarbonTek Process doesn't damage sensor or catalytic convertors and our customers enjoy seeing the system work.

Having CarbonTek Hydrogen Service on our Service Drive has produced in excess of \$39,000 GP YTD. Both our Advisors and Technicians enjoy offering and doing the service but best of all our Customers enjoy the results of better fuel MPG's, better performance, reduced emissions.

CarbonTek Service has been a WIN WIN for Baker Nissan and our Customers.

A handwritten signature in black ink, appearing to read "Chris Cumberland".
