

January 2, 2021

57 Gasoline Alley, Suite A
Indianapolis, IN 46222

Jerry of CarbonTek Central Indiana showed up to our business location to service my Ford F-250 as well as my wife's 2017 Ford Explorer to perform his carbon "detox" on our vehicles.

With our busy life running a business ourselves, the customer service Jerry provided by coming to us was exceptional. It only took about an hour to do both vehicles and we immediately saw better fuel mileage. I believe the CarbonTek process is an easy maintenance step at an affordable price to help elongate the life of your vehicle.

We highly recommend the CarbonTek USA process and will continue to use their services for both our business and personal vehicles. We are excited to use the CarbonTek process on the motorcycles in our v-twin motorcycle industry. Thank you Jerry for your excellent customer service!

Thank you,
