Testimonial of CarbonTek

Our company operates two recycling locations in South Florida, one in West Palm Beach and one in Pompano Beach. We introduced CarbonTek Hydrogen services as part of our maintenance program at both locations in early 2019.

We operate a fleet of large Caterpillar and Volvo loaders, large excavators and small skid steer equipment. Our machines operate 6 days a week with a minimum of 12 hours per days; so, we cannot afford to have unnecessary and expensive stoppages due to regen issues. By introducing CarbonTek services every 6 months, we have drastically reduced Regen / after treatment issues, saved money on repairs and greatly reduced downtime of the equipment.

Richard always shows up on time, performs a proficient service and provides reports on all the equipment. We recommend CarbonTek South Florida and their unique Hydrogen cleaning services to be part of your preventative maintenance program.

For more information about our experience with CarbonTek, please contact Mr. Frank Brown fbrown@lglrecycling.com
